

Magnetic Manipulator

**Handling your cans to weightless
palletize / depalletize**

Most important advantages

- Easy handling for every operator.
- Your employees will be well-motivated.
- The balancing system is protected in such a way, that accidents will be avoided.
- Maintenance-free. As the manipulator and the palletizing magnet work by means of compressed air, which is dry and clean, technical troubles are minimized.
- The load weight is continuously adjustable.
- The balancer can make a turn of 360 degrees. This makes it possible to move the load quickly and easily within an area of approx. 12 m².
- The system will be supplied including a CE-certificate and a manual.

Please forward following information to receive a dedicated solution for your handling purposes:

- Can size(s)
- Can weight(s)
- Pallet layer size(s) / size of requested
