

Vacuum Can Handling

Experience the Force of Vacuum

CANLINE Systems can supply complete tailor-made systems on a turn-key basis or indeed anything in between e.g. part systems.

With over 40 years of experience in can handling equipment CANLINE Systems has expanded into vacuum technology. We now offer the whole range of services in can handling, in steel as well as in aluminium, from small conveying projects, individual components and spare parts, up to turnkey projects and regular service contracts.

CANLINE's scope of supply in vacuum handling equipment runs from cupper to palletizer, including:

- Washer infeed conveyors
- Washer transfer units
- Bright can inverters
- Pin strippers
- OBO discharge elevators/lowerators
- Necker-tester discharge elevators
- IBO infeed elevators/lowerators
- Palletizer infeed elevators/lowerators

We equip our conveyors with components of your choice from proven suppliers, such as Ventinet, Chicago or New York blowers; Intralox, Rexnord or Habasit belts and SEW or Lenze motors. Because we have a firm belief that product support is as important as product quality.

CANLINE is proud of its ability to supply a complete range of services in vacuum technology, from components through to turnkey projects and maintenance contracts. As well as conversions from steel to aluminium.

Complete solutions in Can Handling

CANLINE Systems offers:

- Complete range of services in can handling, in steel as well as in aluminium
- From individual components through to turnkey projects
- Conversions from steel to aluminium
- Maintenance contracts
- Highly competitive solutions, tailored to your needs
